pluriSpin® Human Monocyte Depletion

Product Images

Description

pluriSpin® Human Monocyte Depletion is designed to isolate pure, viable and untouched monocytes-free population from whole blood, buffy coat, cord blood or similar sample material by negative isolation. The product labels monocytes, while the isolated human monocytes-free population are left in the sample. When centrifuged over a density medium the unwanted cells pellet along with the RBCs. The purified monocytes-free population are present as a highly enriched population at the interface between the plasma and the density medium.

Additional Information

Species	Human
Cell Types	Monocytes
Sample Material	Whole Blood, PBMC, Buffy Coat, Cord Blood, Bone Marrow, Primary Cell Solution
Purity	>90%
Storage Condition	Room Temperature
Regulatory Statement	For research use only. Not for use in diagnostic procedures,

Product Options

Size:	2 ml
	10 ml
