Product Data Sheet

PluriStrainer-Maxi (Bottle Top), 5 pcs. , single packed, non-sterile-500 µm

Product Images

Description

The pluriStrainer maxi can connect to GL32 or GL80 bottles via our adaptor. The various mesh sizes and the unique stackability of the pluriStrainer maxi allows to build a filter cascade and separate sample material into different fractionations. Furthermore, the pluriStrainer maxi has a special lid for an automated refilling. The sample material can be drawn directly from the sample vessel into the strainer via this lid. A tubing port enables low pressure for filtration and automated refilling.

Additional Information

Delivery Time (days)	1-2
Variation	500 µm
Housing Material	LD-PE (Low Density Polyethylen)
Sterility	Non-Sterile
Storage Condition	Room Temperature
